The News.

The steamer Star of the West, with two weeks later news from California, arrived yesterday at New York. The mines on Frazer river were still attacking general attention, and a tide of emigration was pouring thither from all parts. Labor was source in the State, and had gone up 20 to 50 per cent. Business at San Francisco is reported quite active.

Col. Starton had lost seven men in an engagement with the Indians, and a general Indian war was expected.

An organized Banditti had committed numerous depredations in San Luis, and a vigilance committee apppointed for protection who had haug four of the colprits. The Indians were committing outrages in the

The Indians were committing outrages in the Northern counties, and a U. S. train had been captured by them in Del Norte, and one mankiled, and several massacres committed on the iverse. A general insing of the Indians was indicated at San Prancisco picked up at sea a Chinese junk with twelve men on board, which had been floating about in a helpless condition for five months. Two destructive fires had occurred in California. The details of the news will be found very in

The Crops. The Waukesha Republican of the 18th, contains the following information relative to the-

crops in that vicinity: "Indications are now common in this locality, that the wheat crop of this year, will be no more that the wheat crop of this year, will be no more than half a crop, and perhaps not that. Winter wheat has been considered for some time in danger from the rust, and these fears, have given place to the conviction that the crop through out the State, will be very light. On Rock Prairie, the same may be said of nearly all crops.—Spring wheat is giving unmistakable evidences of becoming tadly rusted, besides the growth in general is very small. Corn,—the crop that has been considered, almost a failure inteloto, bids fair to be the most productive corn crop grown.

PARKTILLE, Mo., July 8, 1858.

Editors Press and Tribune: - Doring the last ten days, it has been warm and dry, and the surface of the ground is considerably baked. We suffered no inconvenience from rain, until the lat of June when it came down in torrents, and lat of June when it came down in torrents, and washed away rouch of our light soil, and some corn. The prospect for wheat was unusually fine, in northwest blissouri, until it was struck with the rust. Our leading farmers estimate that one third of the crop has been ruined.—Some fields will average 30 bushels to the acre and some have not been worth cutting. A much larger breadth of wheat was sown this year than usual. The caterop will be light At least one-half has been injured by the rust so as not to be worth cutting. Corn that was planted early, and worked eerly, looks very fine; out the late planted, that required working the first three weeks in June, looks feeble, and a great deal has been washed up, as our country is quite rolling. If the balance of the summer and tail is usually seasonable, we shall have a fair q ite rolling. If the balance of the summer and fail is usually so senselle, we shall have a fair crop of corn; for northwest. Missouri has never been known to fail. If corn grows we are cure of our share. Portatoes promise fair. Gardena look fine, where they are not destroyed by worms. The ground this last spring seemed literally filled with worms of all shapes and sizes. With all these drawbacks, the smaller worms have well.

sizes. With all those drawbacks, the smaller representation of properties are required will be more abundant than last year. Cherries have been pleutitul. Plums have been n jured some by the worms, but not so much by the curculio as usual. Apples dropped from the trees very much during the wet weather in June, but what were left will be large and fine. The crop will be larger than last year. Our early harvests are fully ripe, large and delicious.—Pear traces are moderately full. Our young peach trees, three years old are full, and we shall soon have glenty of this delicious fruit.

Editors Chicago Press and Tribune: - Yesterday, in company with two friends, I rode out north of Sterling to Dr. Penningten's, and thence westerly to Hickory Grove. The farmers have commenced harvesting their Wheat, and there was scarcely a field we passed but what was in-jured more orless. The hot weather of the past ten or twelve days has produced a great change upon the prospects of the Isrmer. Great com-plaints are made of the rust and blight. Some fields of Wheat will probably not be cut, while cverywhere there is no expectation of more than half a crop. Wheat sowed on new lands turns out better than that sowed on old. The farmers have relied more particularly upon their Wheat crop, and the result thus far presents

tather a gloomy prospect. Corn looks remarkably fine, but the quantity sown is not so large as last year.

for your satisfaction, have sent you three wamples of different sorts, which will enable you to form a fair idea of their condition. The Canada Ciub seems to suffer most from both diseases—"seas and tust," and all carly wheat is the worst. The samples are from six different fields. I have conversed with some of the most intelliberant farmers in this locality, about the probable went farmers in this locality, about the probable. loss that may be safely predicted on, and they say that, at the very least, one-third of an average corp will be gone; and should the late kinds that are yet comparatively green; be attacked the same way, one-half a crop may be all that can be expected. Editors Press and Iribuse:—Ten days ago the wheat crop in Cedar, Jackson and Clinton counties was considered a good fair yield.—Within the last five or six days the prospects have entirely changed from great hopes to great fears. I have taken pains to inquire of the farmers and others from different portions of these counties, and find one great complaint—a large portion is blighted and rusted. Many fields no attempt will be made to harvest at all. Oats are attempt will be made to harvest at all. Oats are

Editors Press and Tribune:—From considerable inquiry, together with my own observation, of I have obtained the following facts:
That very little of all kinds of grain has been put in, on account of continuous rains, up to within two or three weeks of this.

That Oats will be a total failure. Wheat is but little better; in both cases the disease being rust.

A universal expression among the farmers is: "We have more wheat left than we expect to get." I have reason to believe that there is considerable wheat left of last year's crop. Wheat siderable wheat lense tweek.

The same as above might be said in relation to the crops for a hundred miles cast and west of this, as far as I have been able to ascertain.

Weather exceedingly favorable to the corn.

market, which he sold to Messrs. A. L. HUTCHtason & Co., for 75 cents per bushel, at least three cents above the current price for spring wheat at the time the sale was made. Mr. HINCELEY had no trouble in disposing of his wheat at this price. Half a dozen buyers were anxious to get it. It was not the best wheat on the market either, but it was clean, and herein lay its peculiar virtue. We saw wheat which was actually of a better quality-although Mr. H.'s was a very nice article-which sold for full three cents a bushel less. But it was dirtythere were cats and other grains to be seen through it, and that was the culy resson why it

did not bring a better price. As a general thing the wheat which comes to this market, is very clean, compared with that Davis, fire-crackers; Mrs. Liyer, sixteen baskets which is received at Chicago and elsewhere, but our farmers can do still better, and by taking our advice, they will keep up the high reputation which Milwaukes wheat has gained abroad, and agers. put money in their own packets at the same time. At the time the accident oc. carred, Sullivan was standing in the rear of a car he was helping to load with lumber. A few steps from him was another car loaded with stone on the same track. While he was thus ergaged, a train of freight cars were switched from another track upon this, the locomotive which was behind, going off in another direction, and the freight train coming with considerable speed, ran against the car which was loaded with stone, crushing Suilivan between it and the one he was loading. His spine was broken and he was otherwise terribly injured, and survived in terrible

State parties were making arrangements same purpose.

The effect of the excitement was beginning to be felt in the State. Labor was scarce and wages had gone up 20 or 30 per cent. It is estimated that 8,000 people have already left for

timated that 5,000 proper have another the diggings.

Six teamers had been put upon the route, besides ten sailing vessels.

Several American new-papers are projected in the British presessions, and one, the North American, had already been announced at Victoria. The steamer Cories had taken 1,500 passen-

sers for that city, and every berth in calling res-sels were taken several days in advance. The Hudson Bay Co. have stationed armed vessels on Figzer River, to prevent emigrants from carrying goods into the interior to cell. An American vessel with merchandize, it wa reported, had entered the river in spite of the blockade, the British commander not daring to fire upon her.

Business at San Francisco during the fortnight,

had been quite active, with some sales of pro-visions and refined sugar to arrive.

There had also been an active demand for min-ing impliments, clothing and fire-arms, at ad-

anged prices.

The money market had been inactive, but The money market had been inactive, but closed with an improvement.

The defeat of Col. Steptoo is fully confirmed. His troops fell into an ambuscade, when they wore attacked by a large number of Indians, and were forced to retreat with a loss of 7 killed and 15 wounded. The troops were not sufficiently supplied with amunition.

A general Indian war was expected, and Gen. Clark had despatched troops from San Francisco and Los Angelos, and much excitement existed in San Luis. Abisoo Co., and also in Carson Vel.

in San Luis, Abispo Co., and also in Carson Valley, in consequence of numerous robberies and assassinations by an organized banditti.

In the former place a Vigilance Committee had been formed, and had already bung four coingils.

In the latter place, a murderer named Snow, had been seized and hung by the people. Be-fore his death, he made a confession, which led to the capture of seven of his confederates, who,

to the capture of seven of his confederates, who, at last accounts, were under trial for their lives by a body of cilizens.

The Indians in the Northern counties, were again committing outragas. A United States pack train was fired upon in Del Norte, a Mr. Baker killed, and the train captured.

Massacres were committed on the river and outrages in various other places had occurred.

A general rising of the Indians was indicated. The ship Carrican, arrived at San Francisco, had picked up at sea a dismasted Ohinese junk containing 12 men. She had been floating about helpless for five months.

The Terms of Peace.

Col Forner, in the Philadelphia Press of July 5th, has an able article on the different position he now occupies from that which he cocupied on the last Independence Day, when he delivered an oration in Philadelphia. In that oration, he trok the ground on which he supposed the Administration shood, of giving the exercise of true popular sovereignty to the pecple of Kansas, by allowing them to vote on the acceptance or rejection of their constitution.-The Administration was with him then, so was Gov. Walker. Now the Administration have ostracleed both bim and WALKER and Douglas for holding the same views which the Adminis-

It seems now, the Administration desires a reconciliation, and expresses a wish that the division of the Democratic party should be healed. To this desire Col. Foundy replies :

We know, too, that the Lecompton policy is a failure, that it will be utterly annihilated in August, and that no future convention of any party will dare to appland the fatal example which gave us this policy. The Colonel thinks that the Administration cannot be very sincere in this offer of reconciliation, when the Postmaster of Pottsville has just been deprived of his office for presiding at a pub lic meeting in favor of popular sovereignty, and when the party usages in Illinois are trampled upon and set aside by Administration agents.

Their opening will be almost simultaneous, and the double event will be far the most important that has yet occurred in the history of our young

REPEAL OF THE ASSESSMENT Law .-- The Madison Argus proclaims that the democracy will make a repeal of the assessment law a political question at the polls this fall. That would be a magnificent platform for a great political party! Bab! Mr. A yes, you cannot make that move-ment win. The present assessment law needs ment win. The present assessment law needs amending, no doubt, but the people believe in the principle of taxing all property according to its value, and they will have such a law. That principle will be preserved in whatever law is passed on that subject, and all parties agree to to it. If the present law is repealed, another must take its place, based upon that idea; and if we cannot have the details of the present law law perfected by amendments to as to carry out the principle, repeal it, we say. Clipper City Flouring Mills.

Manifowor is carning the title of the "Cipper Ciry" and of being a fast town. She has, in addition to her natural advantages, a Railroad nearly completed, a Daily press, and last, but not least, a fine new Flouring and Grist Mill.— Phis last has been for some time needed, and the want being now abundantly supplied we trust that it will be fully appreciated.

The Mills are located on Commercial street, west of the Tribme effice in the most central

part of the village.

The Machinery is perfect, considered so at least of practical Millerights and Mill owners, and it is take to predict the best kind of work can and will be done there. Farmers have now come encouragement for reising produce, as it can be made available in supplying the home demand, and the surplus can be easily disposed of by means of the large freet of vessels which hail from the renowned Clipper City.

Those of our citizens who are particular about the quality of their flour, can purchase their wheat and send it to the mill for grinding. Mr. Dwyer has exhibited a commendable enterpise and diligence in pushing forward the completion of his mill, and will have two run of stone in operation on the 15th inst. The ground presents are of the ground presents are collent surface—high and dry, running down at one side to living water, affording every convenience and comfort to those having stock or exhibition. Good patturage has also been engaged, adjoining the grounds. It is proposed to enclossabout forty acres, including a mound hear the centre, which overlooks the entire onclosure, and from which there is a first view of the city. Upon the top of this elevation, the Hall of Fine Arts, will be orected, which will present a most commanding view of all around. Thousands may stand upon this hill, and witness every thing that may be going on in any part of the ground, without obstruction. The ground is well calculated for a half mile track for a trotting match, and may be so arranged, as to make ing match, and may be so arranged, as to make a mile track, if desirable. Should the Military desire to have an encampment during the Fair, the lot will admit of excellent accommodations for tests and paradeground. > ASTONIERING Escape.—At Binghamton, N. Y., a little son of Mr. Crary, aged 7 years, fell into a well in that village, a few days sluce, while emdeavoring to raise a bucket of water. The distance to the water is thirty-five feet. The boy's companion, aged about the same, gave the darm. The people found the bucket out of sight and the wateria commotion. The well was narrow and the rope small. The little fellow soon came to the surface of the water and graspsoon came to the surface of the water and grasped the bucket, to which he clung with his fingers until hauled to the top of the well. The bucket being nearly horizontal and quite slippery, how he held binned! so long, with a grasp of only about one-half the length of his little ingers on the edge of the bucket is tally wonderful.

SUB-MARINE LANTERS,-We witnessed, on Thursday evening, a trial of a sub-marine lan-ters, invented by Mr. Charles M. Gould, of ters, invented by Mr. Charles M. Gould, of Worcester, Mass., for which he has taken out letters patent. The object is to convey light to divers, searching for articles lost beneath the vasty deep. The invention must prove of the greatest material benefit, not only to the inventor, but to those who shall avail tnemsolves of its vast facility for probing the dark bottom of the rea and lakes for lost treasure. The want of light has been the very thing standing in the way, heretofore, of the complete success of submarine operations.

of light has been the very thing standing in the way, heretofore, of the complete success of submarine operations.

The lantern is simple in its construction and certain in its operation; it is light and portable in form, convenient to carry about by the diveriable in form, convenient to carry about by the diveriable in the particular divection in which it may be required.

It is constructed with two concentrical arranged glass eylenders, with an air space between them, giving a clear light without dimming the brightness of reflection. It has a condensing air chamber, a sub-air chamber with communicating perforations in opposite directions from each other, and spring valves in connection with a fuel and escape pipe. The air is so graduated and equalized that only such quantities as are necessary to supply combustion are admitted into the interior of the lantern.

The gases and other products evolved from the flame pass of through the ascape pipe. There is also a reservoir within the house which will supply burning material for four hours, and a longer time if necessary.

which will supply burning material for four hours, and a longer time if necessary. The following recommendation is from C. B. Peatt, a well known wreaker in sub-marine bus-

ness:
This certifies, that when exploring and as This certines, that when exploring and at work on the frigate Huzzar, sunk in the wators of Port Morris, in New York State, I made use of Gould & Lamb's sub-marine latturn to examine the wreck of said vessel, then lying seventy-two feet under water, and obscure from any light, showly

enty-two feet under water, and obscure from any light above.

The first time the light was put down it remained one hour, retsining its brilliancy and gire ing a vivid light sufficient for practical purposes. I used it the evening in different positions, to test its utility and practicability. In clear water it gives a very strong light, illuminating objects very distinctly from eight to twelve leet. It very distinctly from eight to twelve feet. It was far beyond my expectations. I can safely recommend it as being a very valuable and useful apparatus, which must prove of great service in exploring lost and sunken vessels in deep water. I can see por cason who it cannot be used three hundred feet under water with as good success as seventy-two. It is the best thing I ever saw for the purpose, and I believe it must prove of great advautage to those exploring the waters for lost treasure, as well as commerial interests.—Huffato Express.

ASCADIA.—Bayard Taylor has vicited Arcadis, the accient Greek paradise, the land of poetry, music, pastoral blessedness sporting nymphs and spouting fountains. Here is a picture of it: main, partoral blesseduces, sporting nymphs and spouting fountains. Here is a picture of it:

On approaching Tripolitza, we came upon the grand central plain of Arcadia, which is between two and these thousand feet above the level of the sea. Here the season was nearly a month later than on the plain of Argus, and the country had a gray, wintry look. There is not sufficient drainage for this plain, and hence parts of it are mersby and missmatic. One to whom poetry has made the name of Arcadia a golden sound, the key to landscapes of ideal leveliness, skys of perpetual spring, and a pure and happy rase of men, will be bitterly disappointed as he descends from the gusty Farthenian Hills. In this bleak region, surrounded by cold, naked mountains, with its rough barbaric Slavonian population, and its flithy den of srcapital, he will not recognize one feature of the Arcadia of his dreams. But so it is: the "bella etc dell' oro" of Tasso and Hesiad never excited and never can exist, and Arcadia, which is for us the musical name of a beautiful impossibility, signifies no more to the modern Greek than Swampscot or Sheboygan.

Descending to the floor of the valler, we rede

Descending to the floor of the valley, we rode
over the cozy turf to Sinanu, a scattering town,
with broad, grassy streets. We mot many shepherds in sheggy sheepskin capotes and with
long crooks in their hands. The people came in
a body to the dirty little cafe where we halted,
in order to stare at us. Three or four spruce
young palikars offered to accompany us to the
theatre of Megalopolis, which is about helf a mile
to the north of the town. As Francois had told
them that I spoke both ancient and modern
Greek, they plied me with questions the whole

THE ALBANY OFSERVATORY .- The controversy THE ALBANY OSSERVATORY.—The controversy about the Albany Observatory has given birth to an unexampled number of puns. Witness the following from the Albany Statesman:
"Indeed, until the Trustees mounted Dr. Gould, no progress whatever was made in mounting either of the great Telescopes. Until the beard threw itself into boxing attitude, the Transit instrument and the circle were not unboxed. The promptness with which Dr. Gould set about all this work on the instant that the present all this work on the instant that the present controversy broke out, is a sufficient acknowl-edgement of its necessity and the unpardonable character of its former neglect. Why, the circle has rested in its nine boxes since the 12,h of last has rested in its nine boxes since the 12.h of last October. Can the Tribune or Dr. Gould get around that? The Iransit has been snugly packed, without being disturbed, for over twenty mouths. Sic transit the Tribune's defence of its Astronomer?

IMPORTS.

A better feeling was manifested in our market to-day, and we note an improvement, both as regards prices and transactions. The whent market opened this morning with about the usual degree of activity, and the sales ing win about the day were mostly at yesterday's prices. In the afternoon, when it became known that the N. Y. wheat market had advanced, dealers have operaton choice g-ades of spring wheat. Receipts of wheat by Railroad to-day are not quite so larger as a sesterday but of oats are considerably larger, upward of forty thousand bushels of the latter sold at 88c, free on board. thousand unlargest amount of oats that has ever changed hands in this market in one day, we believe. In other grains than wheat, there is no material change in prices. The weather to-day has been somewhat warmer than The weather to-day has occar being water water to the present of the present of the present of the present of the mercury this morning marked 72, since which it has fallen one degree. We continue to receive unfavorable accounts of the wheat crop from nearly all parts of Hilling Iowa, and from many places in this State. In the two rmer States a poor crop seems inevitable. We quote

o-casy: WHEAT—Market active and higher. The principal sale in the early part of the day were at the following figures but an advance on Spring wheat took place in the after-noon. We note the following sales: 850 bags extra cleaned XXX club at 75c. (This is sumewhat above the mar bet. The lot was very clean and nice, and the price was run up to the highest notch by means of a brisk competi-tion amongst a few Euyers, each of whom wanted to get hold of it.) I car load XXX milling club at 64c; I can load extra do at 72c; 400 bags do at same price; 481 bags do at 71c; 800 bags do at 70Mc; 250 bags do at 70c; 806 bags choice dry No. 1 at the same price; 2,200 bags do at 59c; 200 bags at 68%, and 800 at 68c, 220 bags ordinary No. 1 at 67c: 100 bags good common at 65c, and 200 do at 68c; 300 bags choice white whiter at 57%; 150 bags do at 55c, and 150 bags common do at 75c.

FLOOR—Prices are unchanged and market quiet. Sales of \$50 bbis country brands spring extras at \$8,50 free on

board.

FREIGHTS—Are rather quiet to-day. The Sch. Enterprise loads with wheat to Oswego at Sc, and the Flora Watson to the same port at T.S. Two vessels are loading with outs on owners accounts.

Ours—The shipping demand continues active, and receipts are much larger. Sales to-day of upward of 2,000 bags in small lots on the platform at 81c, and of two car-goes amounting to 85,000 bus at 83c f. o. b.

Bartay-Continues in fair request at \$5a40c for prime Sales to day of 170 bags at 87. Rys-Is quite dull and nominal.
